

**FRESH ICE.
PURIFIED WATER.**

PRODUCED ON SITE

Engineered by Ice House America.

LARGEST CAPACITY HIGH VOLUME DESTINATION

The Ice House is our premier ice and water vending machine, offering the highest capacity production and storage of any of our three models. It is the nation's leading ice and water vending destination and features five patented technologies plus a filtration process that ensures the freshest, most hygienic ice and water product available. About the size of two parking spaces, the Ice House is the high capacity, high volume solution for your high traffic location, such as retail business centers, home improvement locations, recreational centers and convenience store locations.

ICE HOUSE

Our story

Founded in Moultrie, Georgia in 2003, Ice House America designs and manufactures equipment that produces ice and water where people need them. Our experience spans independent operators, retailers and businesses with different demands and operating models.

Made for your business

Make on-site ice and water part of your operation. IHA can help assess demand, equipment fit, installation and service needs. Choose graphics that belong to your business, with equipment engineered by Ice House America.

Support beyond installation

Stay connected to IHA for operator training, technical support, parts and service planning. Discuss the support options available for your equipment and location.

Warranty information

Request the current written warranty for the selected equipment and components before purchase.

Built for high-volume demand

The Ice House is IHA's high-capacity flagship, with a 6,500 lb storage bin and a 200 sq. ft. footprint. It suits locations with substantial demand and room for a dedicated unit. Discuss ice-maker configuration, daily output and installation requirements with IHA.

Water treatment options

Configure water treatment for your location and water supply. Sediment and carbon filtration and a water softener support ice and water production; reverse osmosis is an available option. Confirm the selected configuration with IHA.

SmartIce remote management

SmartIce connects operators with machine information, including sales and operating data. Review activity across locations, track performance and monitor service needs remotely. Ask IHA about the reporting, alerts and camera options available for your equipment.

Technical Specifications

- Dimensions : 8' 4" W x 24' D x 15' H (2 parking spaces)
- Products
 - Bulk Ice
 - Bagged Ice: 10 lb, 16 lb, and 20 lb options
 - Purified or Filtered Water: 1, 3, and 5 gal options
- Ice Bin Capacity: 6,500 lbs
- Ice Production Capability: 4,500 - 13,000 lbs in 24 hours
- Healthwise™ Filtration System
- SmartIce™ Remote Management

Ice House with 5200SM Ice Maker

- Power Requirement: 77A @ 208- 240/60/3 (123A w/2nd Ice Maker)
- Power Consumption: 216 KWH per 4,500 lbs
- Water Consumption: 542 gal per 4,500 lbs
- Ice Production: up to 4,500 lb per 24 hrs (9,000 lbs w/2nd Ice Maker)

Ice House with 1000SM Ice Maker

- Power Requirement: 98A @ 208-240/60/3 (158A w/2nd Ice Maker)
- Power Consumption: 300 KWH per 6,500 lbs
- Water Consumption: 783 gal per 6,500 lbs
- Ice Production: up to 6,500 lbs per 24 hrs (13,000 lbs w/ 2nd Ice Maker)
